6mm SK75 12 Strand Plaited Dyneema 200m Spool

Dyneema SK75 is made from ultra-high molecular-weight polyethylene and is an extremely high-strength, low-stretch rope.

Dyneema is stronger than steel cable, floats on water and is extremely resistant to abrasion. It is commonly used to replace steel cable when weight is an issue. It also makes an excellent material for winch cables.

Features

- Specific Gravity 0.97 (Floats)

- Melting Point 150°C
- Max Elongation at Break 4%
- Average Breakload 3.2t
- Weight 2.0Kg per 100 Metres
- Very High strength to weight ratio
- Very high abrasion resistance
- High UV Resistance

Applications

- Strops, Halyards, runners.
- Checkstays, Afterguys.
- Wire Rope replacement
- Winch and Crane ropes.
